How to create a If Shippo Then That Recipe

1 Make sure you have an IFTTT account:
http://ifttt.com/join

2

Connect to the Maker Channel:
http://ifttt.com/maker

a
Connect to the Channel

b
This is your key
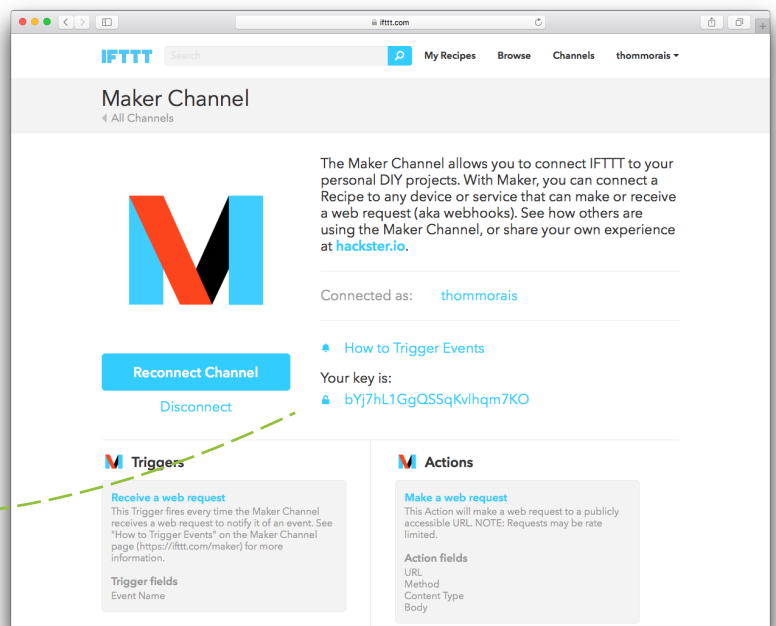

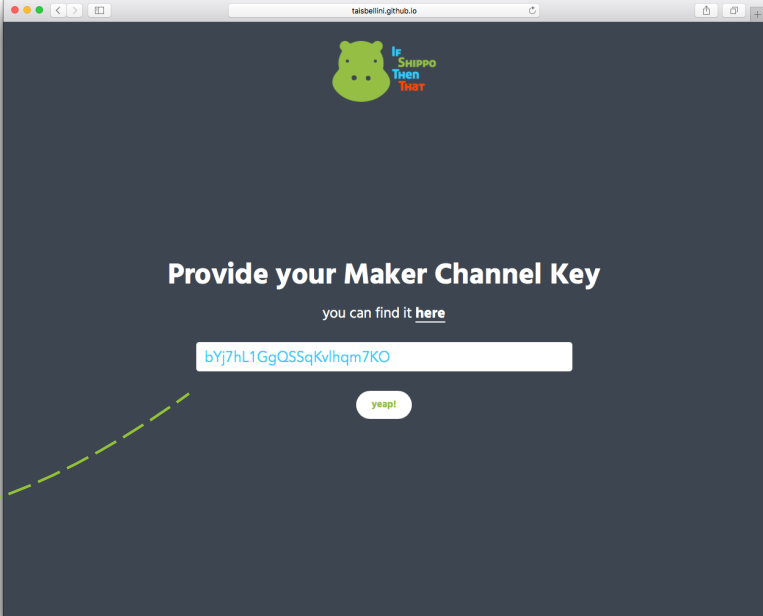

3

Go to http://istt.vai.la
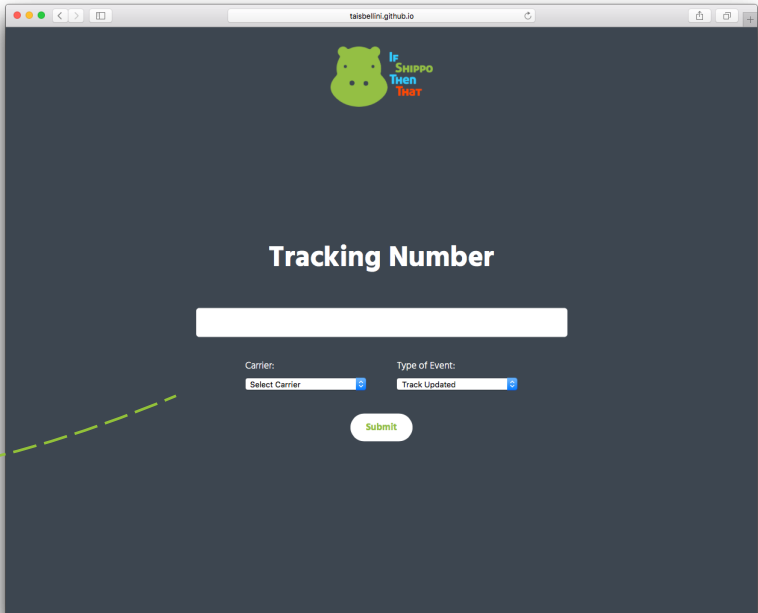

a

Put the KEY

b

Put the information of the shipment you want to track by ifttt.

4

Now you can go to IFTTT and create a new Recipe using the Maker Channel as THIS.
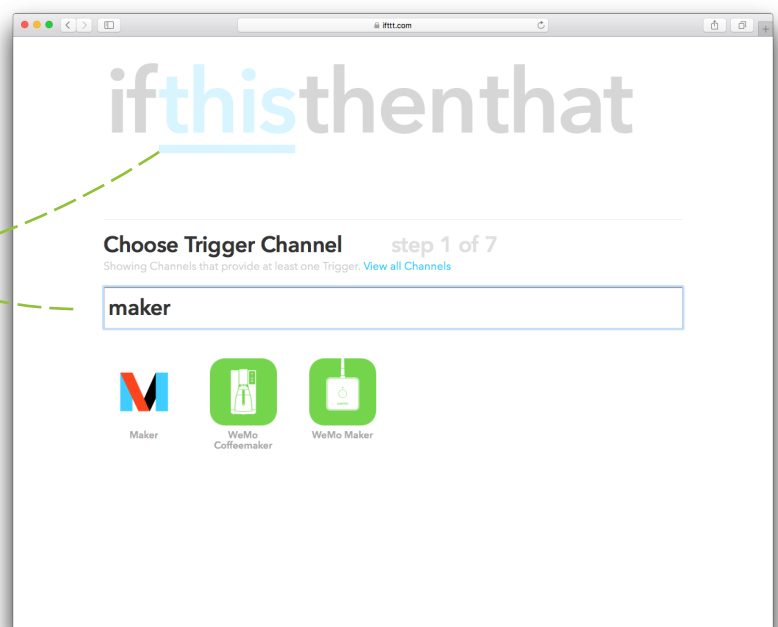

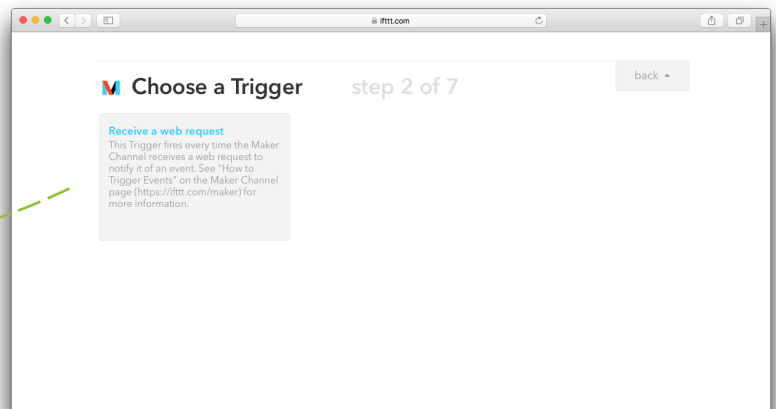

a

Go to My recipes ➔ Create recipe

https://ifttt.com/myrecipes/personal   https://ifttt.com/myrecipes/personal/new
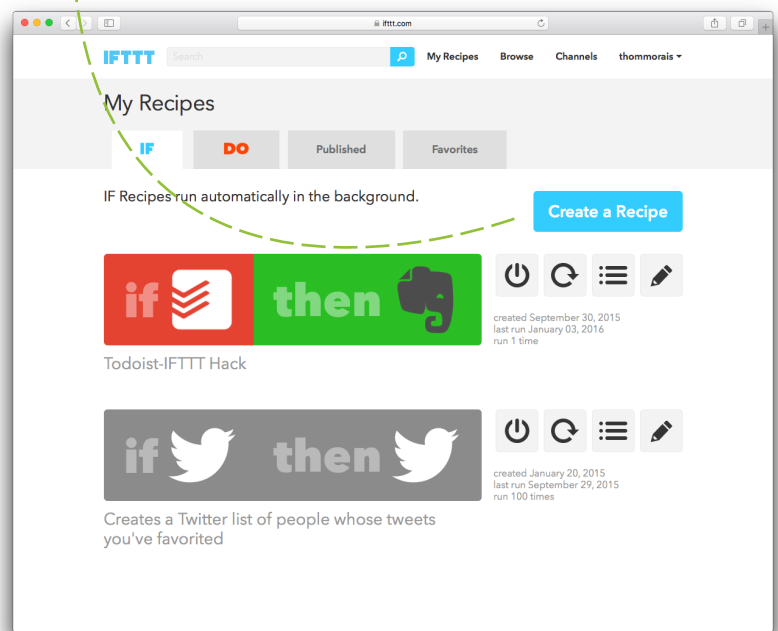

b

click on THIS and search for Maker

4

c

Choose the "receive web request" trigger

Choose a Trigger   step 2 of 7   back

Receive a web request
This Trigger fires every time the Maker Channel receives a web request to notify it of an event. See "How to Trigger Events" on the Maker Channel page (https://ifttt.com/maker) for more information.

d

Complete the Field:
Event Name: track_updated or track_delivered. (The SAME you chose in step 3b)

Complete Trigger Fields   step 3 of 7   back
Receive a web request

Event Name

track_updated

The name of the event, like "button_pressed" or "front_door_opened"

Create Trigger
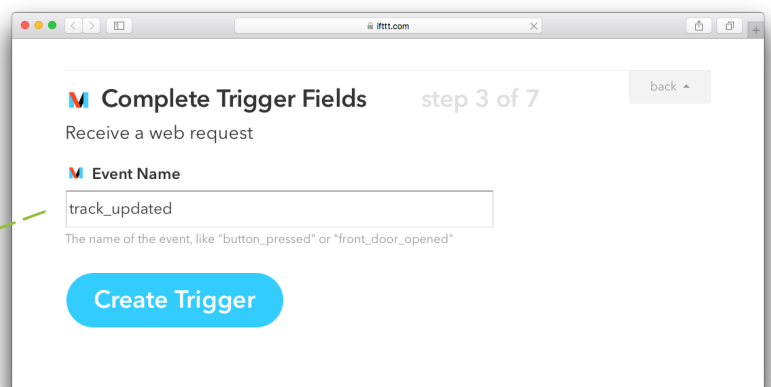

4

e

Create the THAT part, using whatever channel you wish.

if **M** then that
Maker Event "track_update"
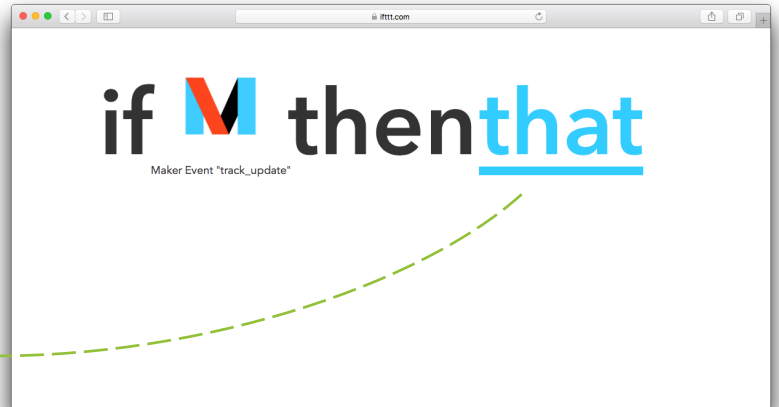

f

I'll use Twitter as the example and choosing the "Post a tweet" action.

if **M** then that
Maker Event "track_update"

Choose Action Channel   step 4 of 7   back ▲

Showing Channels that provide at least one Action. View all Channels
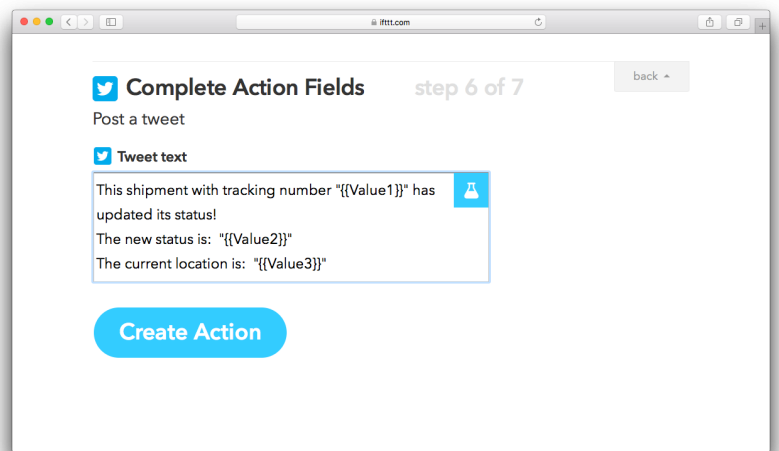

twitter

Twitter

4

g

Create the message you wish. Our application sends the following data to IFTTT:
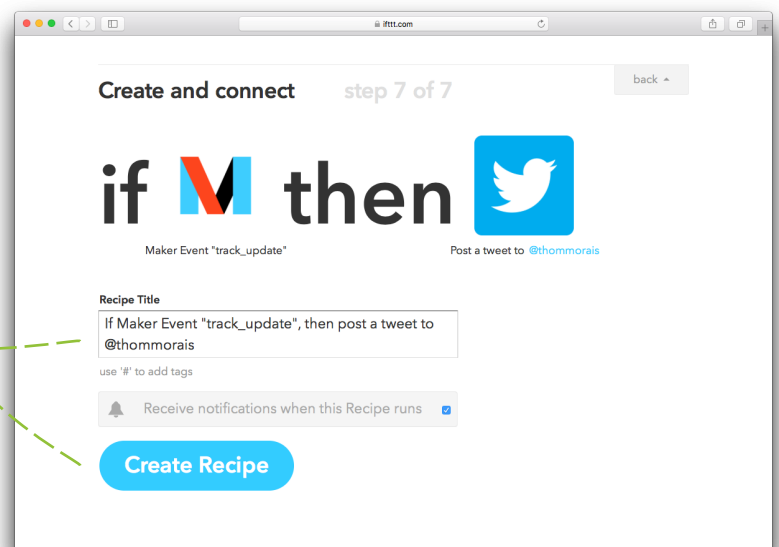

Value1: tracking number
Value2: written status
Value3: current location

h

Give the recipe a title and **create!**

Using a pre defined recipe

To make things easy to the user, we made two recipes that would have more use cases:

If Shippo Then Gmail   **If Shippo Then SMS**

1

To start using an existing recipe:
Go to the recipe link (Gmail as example):
https://ifttt.com/recipes/384912-if-shippo-then-gmail

a

Put the correct Event name as mentioned in 4d.

1

b

Put your email address.

c

Click Add

Note that if you use this recipe you'll receive a pretty e-mail like this:
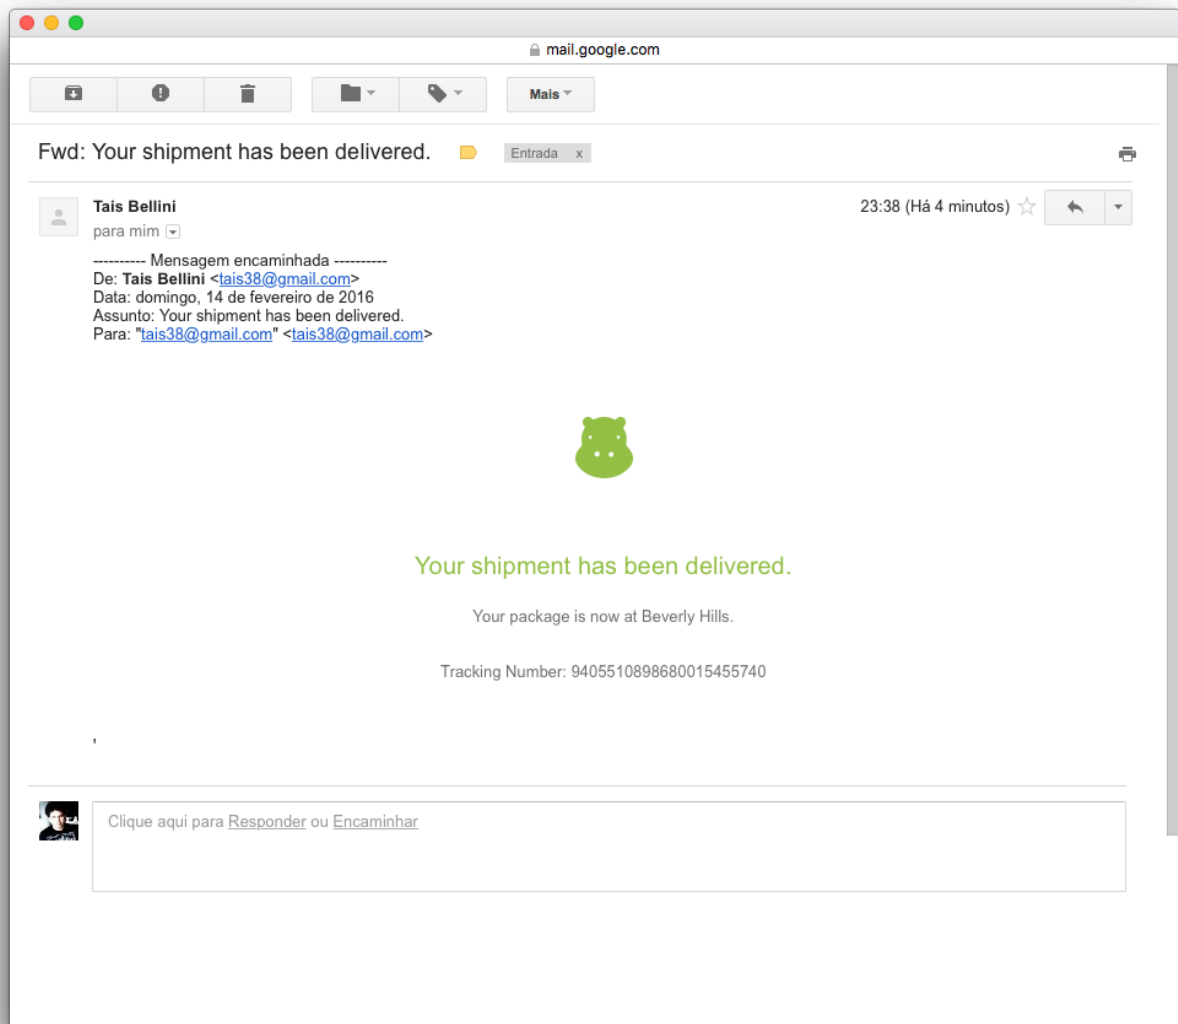

because we put an HTML in the body of the email when creating the recipe (You can do that too if you create a recipe with Email or anything that accepts an html). The html is in github.

If you have any doubts contact us at:

mnstrscontact@gmail.com

IF
SHIPPO
THEN
THAT

Code: https://github.com/mnstrs/ifShippoThenThat
